

ECOSTICK® 1816C

Description/Nature of the product

Acqueous dispersion of a polymer based on modified polyurethane

Application by

Spray gun, brush, sponge

Characteristics

Water based adhesive ideal for coupling leather, eco-leather, fabrics, covers, cardboards. Good bonding strength also on synthetics and other plastic materials. Suitable for gluing leather having a grease content up to 8%.

Instructions for use

If it is used as a classic contact adhesive apply ECOSTICK® 1816C on both sides, let it dry and couple. Coupling is possible after 5 minutes from drying point. If it is used as a contact adhesive apply on one or both sides and couple when it is still wet.

Open Time

Up to 2 hours when applied on both sides

Remarks

One of the materials to be bonded must be absorbing, otherwise let it dry completely and use the classic contact adhesive technology
