

ECOSTICKÂ® 9015ST

Description/Nature of the product

Modified poly-chloroprene latex, 50% c.a in water.

Application by

Spray gun, roller machine

Characteristics

Ideal for coupling and folding leather, eco-leather, fabrics, covers, cardboards, for producing belts, uppers, bags, wallets, heels, orthopedic insoles and for assembling insoles.

Instructions for use

When applied on one side, couple and press while the glue is still wet. When applied on both sides, coupling can be done immediately, either after 3 minutes or up to several hours.

Open Time

Up to 24-48 hours, depending on the amount of adhesive used and on the kind of support.

Remarks

If the open time is exceeded, bonding can be made after having warmed up at 60°C the material to bond.
